PowerMeis software

Thursday, 29 September 2016 14:30 (1:00)

Content

The use of cloud computing for the simulation of MEIS/RBS spectra is showed. The integration of PowerMEIS with a web server provides to users worldwide a platform to make and analyze simulations through any modern web browser. An asynchronos server algorithm handles simultaneous simulations, allowing for multiple users at the same time. This platform was extensively used for all MEIS spectra fittings during a recent MEIS Round Robin Table.

Summary

Presenter(s) : GRANDE, Pedro L. (Federal University of Rio Grande do Sul, Porto Alegre, Brazil)

Session Classification : DAY 4
