Jacobi...

Serial code by Dr. S. Brown

Serial code with Open MP

In a given iteration, cell calculation are parallelized with threads

Parallelizing with MPI

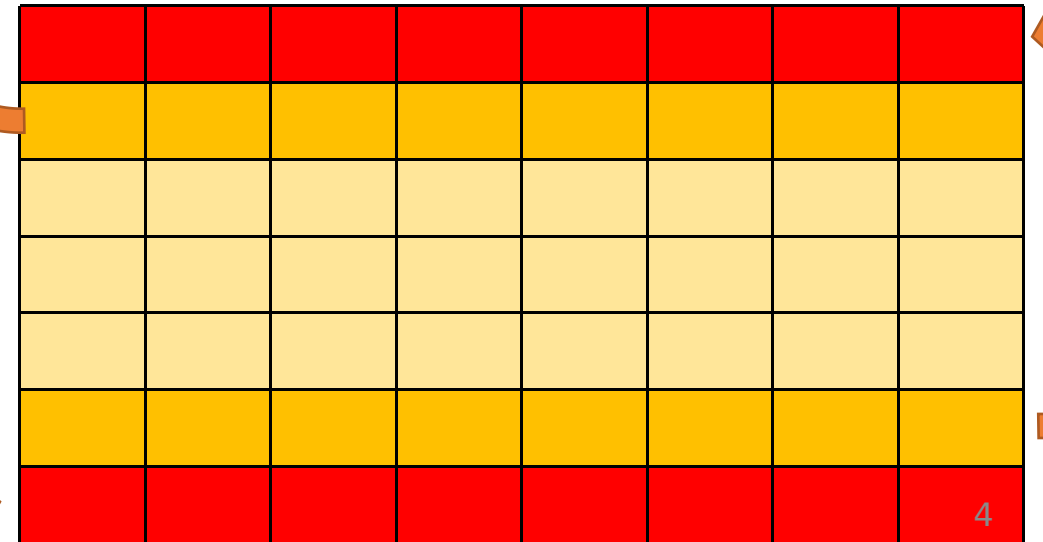

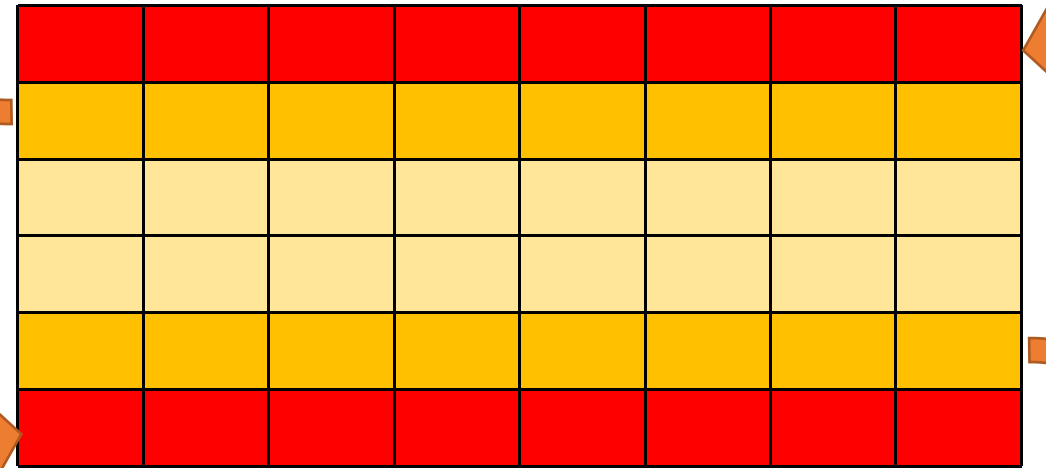

Blocking receive

(then wait for acknowledge from isend)

Non-blocking send

Blocking receive

(then wait for acknowledge from isend)

MPI & OMP with PSC

Best timing

- Threads 16
- Processes 4
- Matrix width – 16000
- Iterations – 1000
- Time taken to execute – 97.5 s
- Conclusion:

MPI & OMP with PSC

Best timing

- Threads 16
- Processes 4
- Matrix width – 16000
- Iterations – 1000
- Time taken to execute – 97.5 s
- Conclusion:

My code is a crap

Things that you think they are easy they are difficult
and
things that you think difficult, they are also difficult

—William—

Thank you for your attention

Grazie ! Gracias ! ස්තූතියි ! धन्यवाद ! 謝謝
