Workshop on Spectroscopy and Dynamics of Photoinduced Electronic Excitations | (smr 3116)

Monday 08 May 2017

ULTRAFAST SPECTROSCOPY - Budinich Lecture Hall (LB) (14:30-18:00)

time	title	presenter
14:30	Snapshots of primary photoinduced events in biomolecules by tunable few-optical-cycle pulses	GIULIO CERULLO
15:30	Role of scaffold flexibility and disorder in the coherent dynamics of bio-mimetic systems	ELISABETTA COLLINI
16:30	Coffee break	
17:00	Momentum-resolved view on electrons, phonons and their coupling in WSe ₂ through ultrafast techniques	RALPH ERNSTORFER
