

Technological approaches of waste cementation (advantages and drawbacks of the different types of processes) - Part 2

Monday, 16 November 2020 10:45 (0:45)

Content

Summary

Presenter(s) : VARLAKOV, Andrey P. (Stock Company A.A. Bochvar High-technology Research Institute of Inorganic Materials» (SC «VNINM»), Russia)

Session Classification : Basics of cement chemistry (including curing mechanism). Different cement phase/waste interactions (designing of cement matrix for waste composition)
