Joint ICTP-IAEA International School on Radioactive Waste Cementation | (smr 3484)

Wednesday 18 November 2020

Retention of radionuclides by cementitious materials. Behaviour of cement-based materials under irradiation. - Online (10:00-13:15)

time	title	presenter
10:00	Fundamental aspects of leaching processes - Part 2	PROVIS, John
10:45	Static leaching tests - Part 2	ABDEL RAHMAN, Rehab O.
11:30	Break	
11:45	Chemical durability and long-term performance of cement-based materials, with experimental and modelling - Part 2	CHOMAT, Laure
12:30	Acoustic emission monitoring of cementitious wasteforms - Part 2	OJOVAN, Michael I.
