Joint ICTP-IAEA International School on Radioactive Waste Cementation | (smr 3484)

Tuesday 24 November 2020

Influence of geochemistry of disposal site on durability of disposed cementitious matrixes - Online (10:00-13:15)

time	title	presenter
10:00	Cement rheology and its importance in immobilization - Part 2	PROVIS, John
10:45	Experimental evidence of geochemistry of disposal site (Vaalputs) on durability of disposed cementitious matrixes - Part 2	MEYER, Willie
11:30	Break	
11:45	Long term modeling of cementitious waste forms in a shallow disposal environment - Part 2	ASMUSSEN, Matthew
12:30	Natural and technogenic violation of geochemical stability of cement materials - Part 2	PETROV, Vladislav A.
