

# Beyond Open Access:

## Sci|Post

22.Oct.2019 - 10:30  
Marie Curie Library  
Leonardo Building  
ICTP  
strada Costiera 11  
34151 Trieste  
Italy

SciPost is a by-and-for scientists initiative aiming to provide a Genuine Open Access replacement infrastructure for the scientific publishing industry. Its journals are characterized by being open access for both readers (no subscription or reading fees) as well as authors (no author fees/APCs), giving generous licenses (CC-BY) with copyright to the authors.

All editorial work is performed by active professional scientists, without competing financial or corporate interest. As an organization, SciPost is purely not-for-profit and community-owned, and follows a cost-slashing consortial business model.

This talk will outline the initiative's main aspects, current status, and upcoming expansion plans.

Speaker: **Jean-Sébastien Caux**

Professor of Theoretical Physics at the University of Amsterdam

Event co-organized by Asja Jelic and the Marie Curie Library

The Abdus Salam  
International Centre  
for Theoretical Physics

OPEN  International  
ACCESS WEEK  
Oct. 21 - 27, 2019
