“To ensure that science truly benefits the people and the planet and leaves no one behind, there is need to transform the entire scientific process. Open Science is a movement aiming to make science more open, accessible, efficient, democratic, and transparent.”

(UNESCO, 2020)

In the first part of the seminar we will learn from Dr. Ana Persic how UNESCO is taking the lead in building a global consensus on Open Science, including a common definition, a shared set of values and proposals for action.

In the second part Dr. Rania M.H. Baleela will present the challenges faced by researchers in less developed countries in making the Open Science principles an equal opportunity and a global reality.

Dr. Ana Persic

Chief of Science Policy and Partnerships a.i.
Division of Science Policy and Capacity Building
UNESCO

Dr. Rania M.H. Baleela

Pathogen Molecular Biologist and
Open Access advocate
University of Khartoum
Sudan

A virtual seminar co-organized by
Science, Technology and Innovation Unit
& the Marie Curie Library

The Abdus Salam
International Centre
for Theoretical Physics
