

Workshop on
Nuclear Structure and Decay Data:
Theory and Evaluation

4 - 15 April 2005

ICTP, Miramare – Trieste, Italy

The Abdus Salam International Centre for Theoretical Physics (ICTP, Trieste, Italy) in cooperation with the International Atomic Energy Agency (IAEA, Vienna, Austria) is organizing a workshop on “Nuclear Structure and Decay Data: Theory and Evaluation” to be held at ICTP in Trieste from 4 - 15 April 2005.

The Workshop constitutes a unique opportunity for scientists to gain extensive and up-to-date training on the evaluation of nuclear structure and decay data, as developed for the Evaluated Nuclear Structure Data File (ENSDF) and *Nuclear Data Sheets* for the nuclear physics community. Reliable evaluated nuclear structure and decay data are of vital importance in a large number of energy and non-energy based applications such as power generation, materials analysis, dosimetry and medical diagnostics, as well as basic nuclear physics and astrophysics. Important features of these needs are satisfied by the work undertaken by the International Nuclear Structure and Decay Data (NSDD) Evaluators’ Network. The main products of this worldwide network are the recommended data files and evaluated decay data.

Scientists from all countries that are members of the United Nations, UNESCO or IAEA may attend the Workshop. They should hold an advanced degree in nuclear physics, nuclear engineering or related subjects, and preferably possess several years’ professional experience in nuclear physics (related to nuclear structure and decay data). Although the main purpose of ICTP is to help scientists from developing nations through a programme of training activities within a framework of international cooperation, applicants from developed countries are also welcome to attend. As this activity will be conducted in English, participants must have an adequate working knowledge of this language.

As a rule, travel and subsistence expenses for participants should be borne by their home institutions. However, limited funds will be available to support **some** participants from developing countries. Such financial support will be available only to those who attend the entire activity. Thus, every effort should be made by candidates to secure support for their fare from their home countries. No registration fee is associated with attendance at the Workshop.

Application forms for the Workshop can be found on the Web server of ICTP at:

<http://www.ictp.trieste.it/> (Scientific Calendar 2005),

while background information on the IAEA Nuclear Data Section is available from:

<http://www-nds.iaea.org/>.

The closing date for receipt of applications for participation is 1 December 2004.

Those wishing to participate should complete and sign the “Request for Participation” form available from the ICTP WWW server <http://agenda.ictp.trieste.it/agenda/current/fullAgenda.php?email=0&ida=a04185>, and send by mail or FAX to:
