Charmonium Dissociation by Mesons and Heavy Ion Collisions

Gennady LYKASOV
Joint Institute for Nuclear Research
Laboratory for Nuclear Problems
Moscow Region
141980 Dubna
RUSSIA

These are preliminary lecture notes, intended only for distribution to participants
CHARMONIUM
DISSOCIATION BY MESONS
AND HEAVY ION COLLISIONS

a Gennady Lykasov
and
b Wolfgang Casssing

a JINR, Dubna, Russia
b Institut fuer Theoretische Physik,
Giessen University, Giessen, Germany

CONTENTS

I. Open and hidden charm production in heavy ion collisions
II. \((cc)\) dissociation by mesons
III. Initial and Final state interactions
IV. Thermal effects
V. Comparison with another models
VI. Conclusion
