

# String Vacua and the Landscape

29 May - 3 June 2006

*Miramare, Trieste, Italy*

*co-sponsored by:*

*the Max-Planck-Institut für Physik - Theorie, Munich, Germany  
and the Italian Institute for Nuclear Physics (INFN)*

## **A Workshop on Four Dimensional String Physics**

Focusing on Four Dimensional String Vacua, the workshop will discuss the theory and phenomenology of string vacua with emphasis on understanding the landscape of vacua, string model building and the path from string vacua to LHC physics and cosmology.

The main idea of the workshop is to highlight important new developments and problems and to stimulate discussion of these through a small number of daily talks and discussion sessions.

There is a limited amount of support available for participants to attend the meeting, though priority will be given to younger researchers and researchers from developing countries.

We ask that all prospective participants take a few minutes to complete the online Application form and Request for funds at the workshop website:

## **DIRECTORS**

**B. ACHARYA** (ICTP)

**F. DENEF** (Rutgers)

**M. DOUGLAS** (Rutgers)

**S. KACHRU** (Stanford)

**D. LÜST** (Munich)

**E. SILVERSTEIN** (Stanford)

## **SECRETARY**

**ROSA DEL RIO**

## **DEADLINE**

**for requesting  
participation**

**7 February 2006**
