

**INTERNATIONAL SYMPOSIUM ON THE JAHN-TELLER EFFECT:  
NOVEL ASPECTS IN ORBITAL PHYSICS AND  
VIBRONIC DYNAMICS OF MOLECULES AND CRYSTALS  
28 - 31 August 2006**

*Co-sponsored by the: Università degli Studi di Milano - Italy  
SISSA - International School for Advanced Studies, Trieste - Italy  
Millennium Scientific Nucleus Condensed Matter Physics, P02-054-F - Chile*

---

## **Publication in the Proceedings**

The Symposium Proceedings will be published by Elsevier Publishers in one issue of the Journal of Molecular Structure.

The number of pages in each paper should be no more than to 6-8 in the journal print. In preparing your manuscript, please follow the format of the journal, as can be found at

<http://www.elsevier.com/locate/molstr>

A copy of your manuscript should be presented at the beginning of the Symposium. You will have then a grace period to introduce corrections. By September 30, 2006, the final version of the MS should be presented electronically to the journal, via the Elsevier Web system. After the usual review process organized by the guest editors (the Directors of the Symposium) the accepted papers will be presented to Elsevier by the end of December 2006.

The publication of the Proceedings is free of charge. As the Symposium has no Conference Fee, a personal copy of the Proceedings can be ordered at the Symposium registration desk for a reduced price of 30 Euro (25 Euro if there are more than 50 orders) that you may find convenient to include in your travel (conference) expenses.

For any queries please e-mail [jts06@ufro.cl](mailto:jts06@ufro.cl)
