**R & D in issues related to the peaceful use of
nuclear energy**

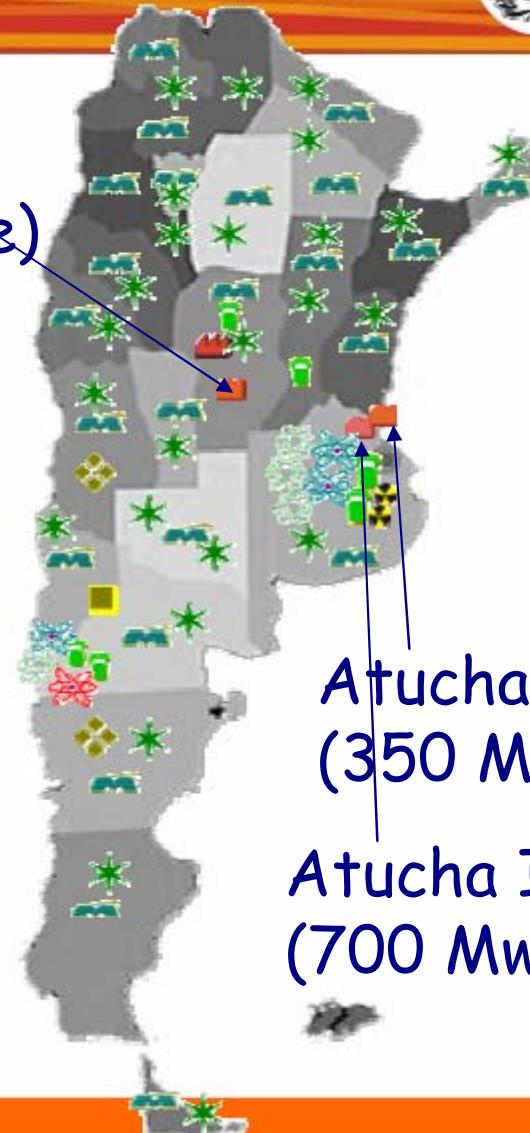

Geographical distribution of activities

- 2 NPP in operation
- 1 NPP in construction
- 6 Research Reactors
- 2 Irradiation Plants
- 1 Heavy Water Production Plant
- 2 Uranium Mines
- 4 Particles Accelerators
- 1 Uranium Purification Plant
- 376 Installations with Industrial Appl.
- 3 Atomic Centers
- 1 Technological Center
- **NUCLEAR MEDICINE:**
 - 3 Nuclear Medicine Schools
 - 68 Cobalt Therapy Centers
 - 57 Brachytherapy Centers
 - 309 Nuclear Medicine Centers
 - 45 Linear Accelerators for Medical Uses
 - 408 Laboratories for Radio immune Tests

Total: 1243 Radioactive Material Users

MIX 3:2 M:T

CONCLUSIONS

Cross section libraries of hydrogen bounded in benzene, toluene, mesitylene y a solution 3:2 by volume of mesitylene and toluene were generated at different temperatures, in particular at 20K.

The Neutron Physics Group has the capability of producing cross section libraries for different materials and validating them performing total cross section measurements with the pulsed neutron source based on a LINAC at Centro Atómico Bariloche.
