Conference on Knots and other Entanglements in Biopolymers: Topological and Geometrical Aspects of DNA, RNA and Protein Structures | (smr 1963)

Contribution ID: 33 Type: not specified

Soft Entropic forces between approaching polymers with prescribed topology: possible implications on the physics of interphase chromosomes

Friday, 19 September 2008 09:00 (0:45)

Content

Summary

Primary author(s): ENZO ORLANDINI (Istituto Nazionale di Fisica Nucleare Padova)

Presenter(s): ENZO ORLANDINI (Istituto Nazionale di Fisica Nucleare Padova)

Session Classification: Soft Entropic forces between approaching polymers with prescribed topology:

possible implications on the physics of interphase chromosomes
