

**Fifth ICTP Workshop on the Theory and Use of Regional Climate  
Models**

*31 May - 11 June, 2010*

**Validation of a high resolution version of the RegCM over the Carpathian basin and  
analysis of transient climate change simulations.**

***TORMA Csaba Zsolt*** and Bartholy J., Pongrácz R., Barcza Z., Coppola E., Giorgi F.  
*Eotvos Lorand University; Department of Meteorology  
Pazmany P. Setany 1/A, H-1117  
Budapest  
HUNGARY*

# Validation of a high resolution version of the RegCM over the Carpathian Basin and analysis of transient climate change simulations

*Csaba Torma, Judit Bartholy, Rita Pongrácz, Zoltán Barcza,  
Erika Coppola, Filippo Giorgi*

*Eötvös Loránd University, Budapest*

*Hungarian Academy of Sciences*

# Outline

- Testing phase
- Validation
- A1B future simulation (2021-50 and 2071-2100)
- Summary
- Future plans

## Testing phase

### Model settings

Resolution	10km, 20km, 25km, 45km, 50km
Central grid	47.5N, 18.5 E
Map projection	Lambert
Number of grid points	200x100, 140x120, 120x100, 100x80, 94x72, 90x70
ICBC	NNRP1 és NNRP2 (2.5°), ERA40 (2.5°, 1°)
Convective schemes:	Grell (FC80), Grell (AS74), Kuo, Emanuel
Number of vertical levels	14,18,23

Testing phase

Field of interest

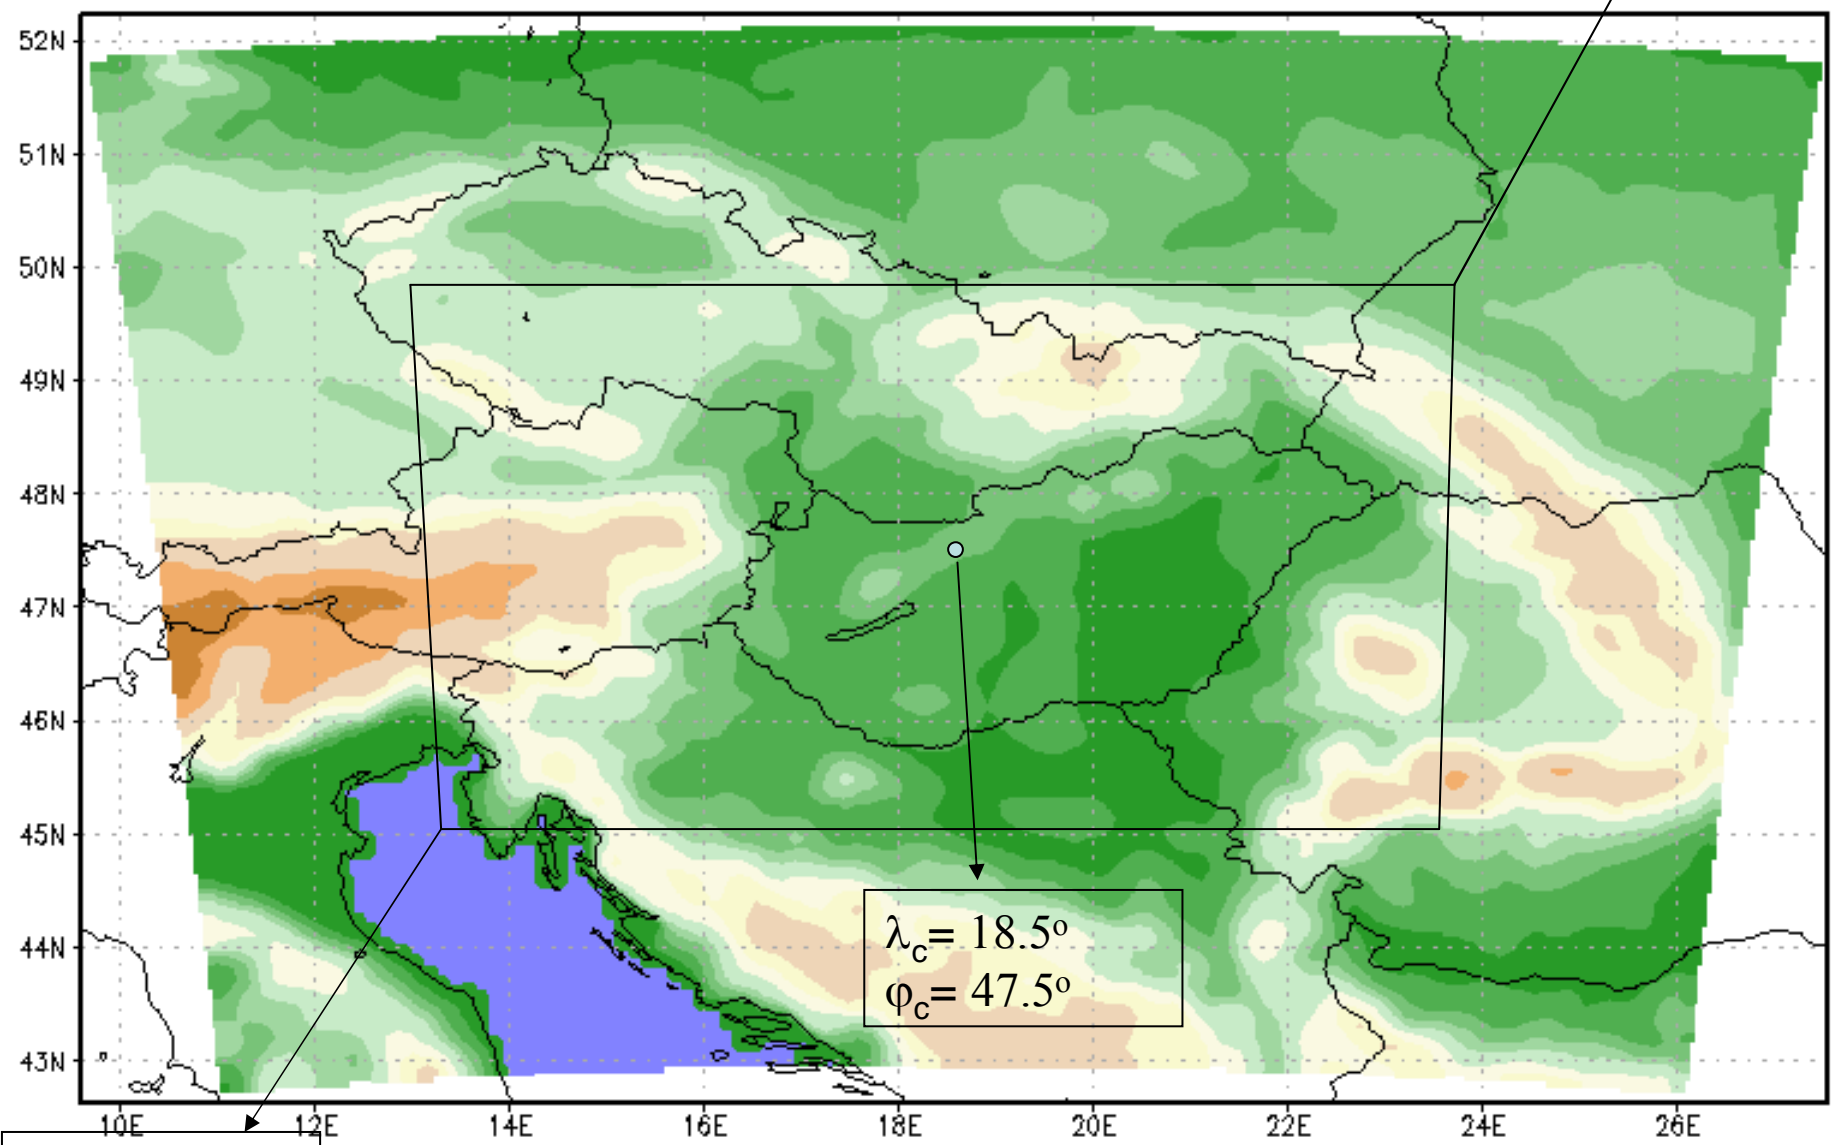

*Eötvös Loránd University, Budapest*

*Hungarian Academy of Sciences*

# Testing phase

$\lambda_{ur} = 23.55^\circ$   
 $\varphi_{ur} = 49.75^\circ$

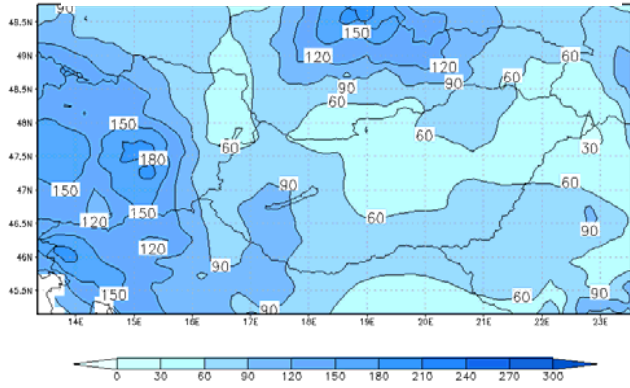

$\lambda_c = 18.5^\circ$   
 $\varphi_c = 47.5^\circ$

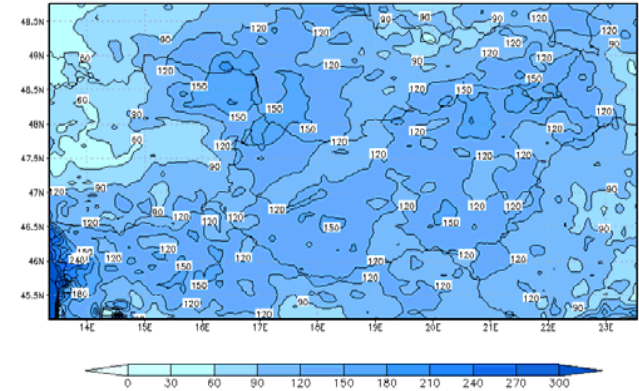

$\lambda_{lb} = 13.35^\circ$   
 $\varphi_{lb} = 45.15^\circ$

## A1B future simulation (2021-50 and 2071-2100)

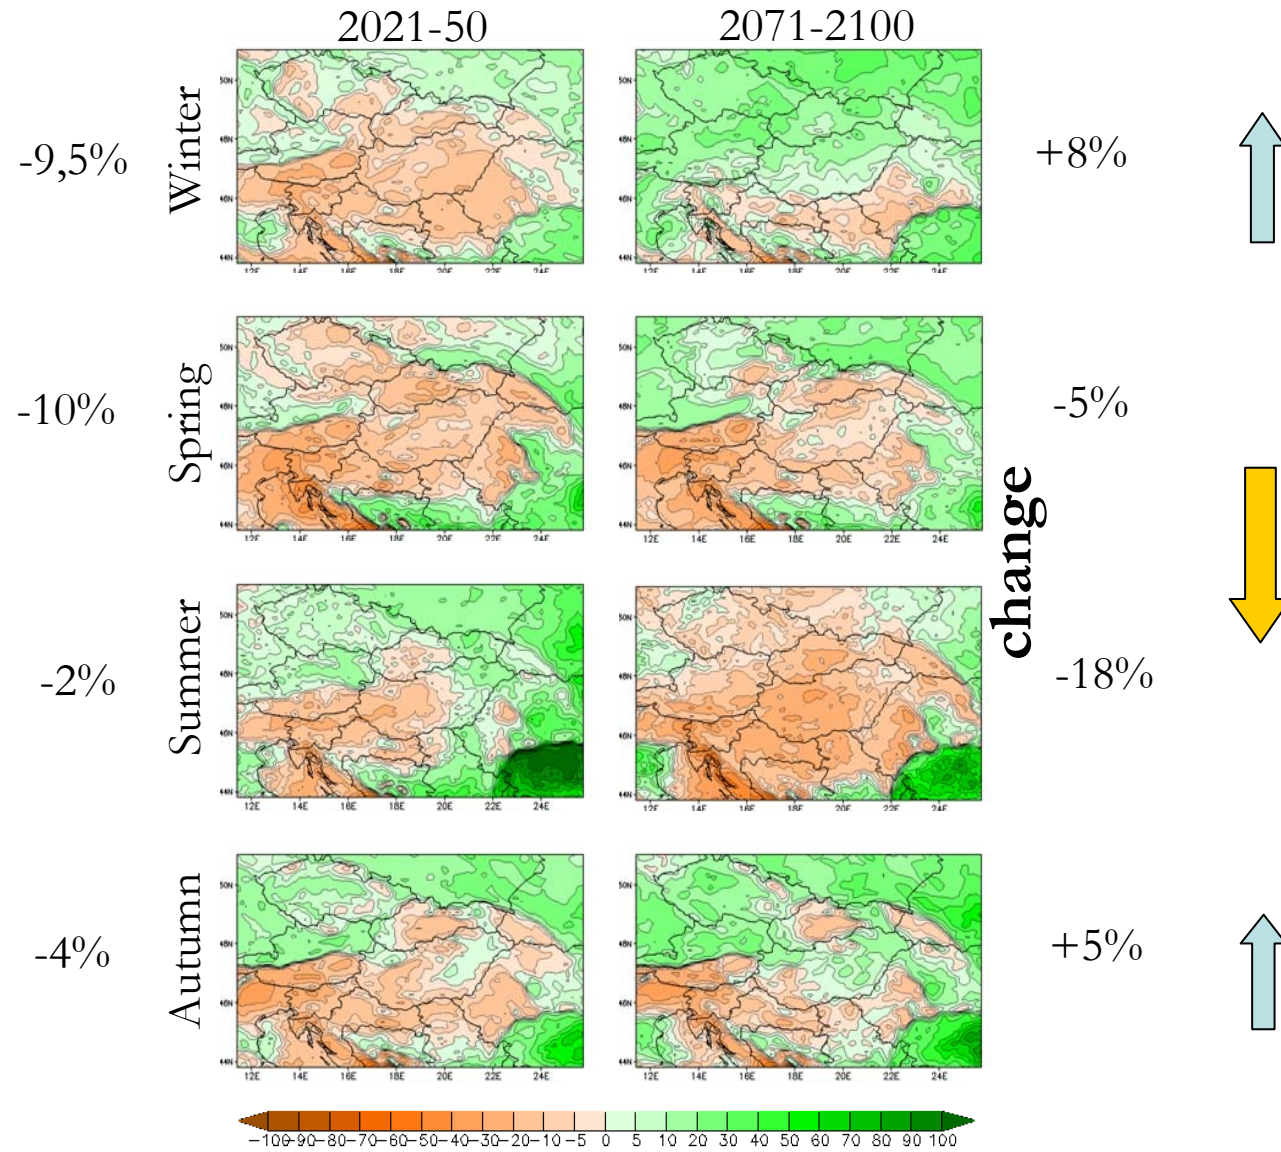

# A1B future simulation (2021-50 and 2071-2100)

## Summary

- Wide range of test runs (domain, schemes, vertical levels...)
- RegCM Beta reproduces well the observed surface air temperature, from climatology to interannual and decadal scales (except winter)
- RegCM Beta tends to overestimate precipitation
- The model is able to reproduce the interannual variability of precipitation and dry/wet spells as well
- On local scale, RegCM Beta shows good agreement with station data
- Warmer and drier summers, and warmer but wetter winters can be expected in far future (Hungary)

## Future plans

- „Mini ensembles” cooperating with the Hungarian Meteorological Service  
(4 regional models: Aladin, REMO, PRECIS, RegCM)
