

# Conference on: **ULTRAFAST DYNAMICS OF CORRELATED MATERIALS**

14 - 18 October 2013

Miramare, Trieste, Italy

This conference brings together leading experimentalists theorists interested in the various issues arising in correlated systems under out of equilibrium conditions. In particular the activity will cover topics such as

- CORRELATED MATERIALS OUT OF EQUILIBRIUM
- **NEW TRENDS IN TIME-RESOLVED SPECTROSCOPIES**
- OPTICAL CONTROL OF ELECTRONIC PHASES
- **ARTIFICIAL TRANSIENT STATES**
- NON-EQUILIBRIUM PHYSICS IN COLD ATOMS

The location and the atmosphere of the conference will encourage the exchange of ideas and perspectives on this emerging field.

# **PARTICIPATION**

Scientists and students from all countries which are members of the United Nations, UNESCO or IAEA may attend the Conference. As it will be conducted in English, participants should have an adequate working knowledge of that language. Although the main purpose of the Centre is to help research workers from developing countries, through a programme of training activities within a framework of international cooperation, a limited number of students and post-doctoral scientists from developed countries are also welcome to attend.

As a rule, travel and subsistence expenses of the participants should be borne by the home institution. Every effort should be made by candidates to secure support for their fare (or at least half-fare). However, limited funds are available for some participants, who are nationals of, and working in, a developing country, and who are not more than 45 years old. Such support is available only for those who attend the entire activity. There is no registration fee.

### **HOW TO APPLY FOR PARTICIPATION**

The application form should be accessed at the activity website: <a href="http://agenda.ictp.it/smr.php?2493">http://agenda.ictp.it/smr.php?2493</a>

Once in the website, comprehensive instructions will guide you step-by-step, on how to fill out and submit the application form.
