United Nations/ICTP Workshop on Global Navigation Satellite Systems (GNSS) | (smr 2617)

Thursday 04 December 2014

Session 8: GNSS for Monitoring Applications - LB (Budinich Lecture Hall) (09:00-12:00)

- Conveners: DEKEL, Tal; JAMAL, Syed Zahid

time	title	presenter
09:00	Ionospheric anomalies of local earthquakes detected by TEC measurements at Tashkent and Kitab GPS stations	AHMEDOV, Babomurot
09:20	GNSS applications in monitoring the movements of the Earth's crust to assess the seismicity of south-eastern Kazakhstan	BIBOSSINOV, Assylkhan
09:40	Evaluation of the deformation parameter of the northern part of Egypt using GNSS	HASSAN, Esraa Emam
10:00	Crustal movements in Bulgaria using GPS	VASSILEVA, Keranka Slavova
10:20	Potential use of GNSS in mountain areas	BHANDARI, Krishna Prasad
10:40	Coffee break	
11:00	Effect of the ionospheric irregularities occurring before earthquakes on the signal parameters of GNSS	PULINETS, Sergey
11:20	Development and application of an experimental data server hosting EGNOS and RTCM/RTK correction data for terrestrial navigation	CEFALO, Raffaella
11:40	Effect of the April 5, 2010 storm on GPS positioning errors at Yamoussoukro	OBROU, Olivier Kouadio
