

Fernando Rincon is Professor of Computer Architecture and Networks at the University of Castilla-La Mancha, and the Head of the Department of Technologies and Information Systems since 2010. He received his diploma in Computer Science from the Autonomous University of Barcelona in 1993. Then he joined the National Center for Microelectronics (CNM) in Barcelona, where he stayed until 1998 when he moved to the UCLM. He obtained his Phd in Computer Engineering in 2003. He has been involved in the Arco research group at the School of Computer Science since its foundation in 1998. His research interests include electronic design automation, Hw/Sw integration, distributed heterogeneous systems and reconfigurable computing. He has also been involved in some research projects involving big spanish companies such as Telefonica and Indra.
