School/Workshop on Wave Dynamics: Turbulent vs Integrable Effects | (smr 3869)

Thursday 31 August 2023

- Kastler Lecture Hall (AGH) (09:00-18:30)

time	title	presenter
09:00	Emergent hydrodynamics of soliton gases in nonlinear dispersive waves	GENNADY EL
10:30	Coffee break	
10:50	Group Photo	
11:00	The mathematical theory of wave turbulence	ZAHER HANI
12:30	Lunch break	
15:30	On the desingularization of pairs of point vortices in the presence of background shear	ZINEB HASSAINA
16:20	Degeneration of Riemann surfaces, Theta functions and solitons	MARCO BERTOLA
17:10	Break	
17:40	Probabilistic study of the formation of extreme waves	RICARDO GRANDE
