

International Conference on Regional Climate- CORDEX 2023

25 - 29 September 2023
A WCRP/ICTP Conference
Trieste, Italy

The conference will bring together the international regional climate research community, focusing on high resolution climate information and its applications to vulnerability, impacts and adaptation and the full spectrum of potential end users of regional climate information.

Description:

There is an increasing need for reliable regional climate information that is scientifically rigorous but also communicated in a manner which all potential end users, from water managers in sub-Saharan Africa to city planners in Manila or forestry owners in Sweden, can utilize for effective impact and adaptation planning. The CORDEX community is working towards meeting this challenge as part of the World Climate Research Programme and in collaboration with other global change initiatives and partners across the world.

A further goal of CORDEX is to build the capacity of regional climate science in developing and transition regions; great progress has been made but there is still much work to be done. ICRC-CORDEX 2023 offers a platform for further capacity development, training and knowledge exchange for developing nation scientists together with the opportunity to expand existing, or build new, collaborations.
