

Participants Talks

Friday, 27 October 2023 16:00 (1:00)

Content

Simon ORREGO (University of Bristol COMET, UK) Coseismic and postseismic activity during the shallow-crustal 2020 Humahuaca earthquake, Argentina, inferred from InSAR observations

Riccardo NUCCI (University of Bologna, Italy) Geodetic Strain rates and Seismicity rates along the Apennines (Italy)

Dimas SIANIPAR (Agency for Meteorology Climatology and Geophysics (BMKG), Indonesia) Seismicity analysis around the Mentawai Megathrust Seismic Gap in Sumatra (Indonesia) and Implications to Understanding of Seismic Cycle

Mingqi LIU (University of Southern California, USA) Thermo-mechanical models of seismic swarms at oceanic transform faults

Summary

Session Classification : not yet classified
