

# Salam Distinguished Lecture Series 2023: Professor Sandu Popescu

25, 26 and 27 January 2023  
Budinich Lecture Hall  
ICTP

[link to zoom webinar](#)

25 Jan, 16:00

**Lecture 1**

The smallest possible thermal machines and the foundations of thermodynamics

26 Jan, 16:00

**Lecture 2**

Quantum non-locality and beyond

27 Jan, 11:00

**Lecture 3**

Multiple-time states and the flow of time in quantum mechanics

**Biosketch:**

*Sandu Popescu is a professor of physics at the University of Bristol, UK. His main field of research centres on the conceptual and fundamental aspects of quantum physics. He is a pioneer of quantum information, best known for his work on entanglement and the associated phenomenon of non-locality, which are crucial for our current understanding of quantum theory.*
