

Speaker: Ashish Rao MANGALORE (Intel Corporation, Germany).
Gabriel Andres FONSECA GUERRA (Intel Coporation, Germany)

Tutorial: Intro to LAVA / training a DL model on Loihi 2

In this tutorial, the attendees will have the oportunity to run code and tutorials designed for learning to use the Lava deep learning library. This library was developed and designed to execute on multiple backends including Intel's Loihi 2 neuromorphic chip. For practicity, the tutorials will run the CPU backend but the attendees will be invited to join the INRC community where cloud access to the neuromorphic chip is possible.
