

# **Suggested Literature on Structure Formation**

**Fabian Schmidt**

- Cosmology in general: Modern Cosmology, for these lectures: Chs. 8, 12, 11
- Perturbation theory: Bernardeau et al, 2002
- Effective field theory: Baldauf lecture notes; original ref.: Baumann et al, 2012
- Bias: Desjacques et al, 2018, in particular Sec. 2 (general bias expansion) and Sec. 4.1 (computing n-point functions)
- N-body simulations: Oliver Hahn's lecture notes; Raul Angulo's lecture slides (material from both is used in these lectures)
