

Joint ICTP-IAEA Workshop on Radiation Protection in Image-Guided Radiotherapy (IGRT)

Description:

The workshop aims to provide participants with specialized training on radiation protection of patients in Image-Guided Radiotherapy (IGRT) procedures.

MORE DETAILS:

IGRT enables obtaining images of possible changes in margins and contributes considerably towards improving the accuracy of the treatment. On the other hand, IGRT delivers an extra dose to the patient outside the tumor target, which increases potential radiation risks. The workshop will support knowledge, practical skills, and competencies in this field. The workshop seeks to target experienced clinical medical physicists from departments performing an IGRT in their clinical practice. Participants are expected to present the status of the radiation protection program in their departments.

7- 11 October 2024

Trieste, Italy

**Deadline:
31 May 2024**

DIRECTORS:

V. GERSHAN, IAEA

LOCAL ORGANISER:

M. ESPOSITO, ICTP, Italy

FURTHER INFORMATION:

E-mail: smr3972@ictp.it

Web: <https://indico.ictp.it/event/10510/>

Female scientists are encouraged to apply.

GRANTS:

A limited number of grants are available to support the attendance of selected participants, with priority given to participants from developing countries. There is no registration fee.
