

Carola Segale, Enel

Carola Segale is Climate Data Analyst at Enel Group. Since June 2021 she has been contributing to the definition of the Group's Climate Adaptation Plan relying on the latest developments in climate science. With climate data and a constant dialogue with internal stakeholders to better understand needs and areas of intervention, she develops ad hoc analyses on climate change impacts on assets and the business. She holds a MSc degree from Bocconi University in Economics and Econometrics with a focus on data analytics.
