

Cristina Dominguez, SEforALL

Cristina Dominguez is Energy Planning Specialist at Sustainable Energy for All (SEforALL). She has over 7 years of experience in supporting countries with their planning of electricity and clean cooking access, as well as energy transition strategies, having designed, managed, and implemented different projects with a wide range of stakeholders in Africa, South Asia, and Latin America. She holds a PhD degree from ETH Zurich in geospatial analytics and AI applications for electricity demand projections to improve energy access planning. Before joining SEforALL she led multiple efforts focused on supporting the integration of national and sub-national energy planning activities in East Africa.
