Beyond Uniform Hyperbolicity II: Unstable entropy, generalized u-Gibbs measures and classification complexity | (smr 4157)

Monday 09 June 2025

Lightning talks: Lightning talks - Budinich Lecture Hall (LB) (17:20-18:20)

time	title	presenter
17:20	Existence of Measures of Maximal Entropy for a certain class of C1 Robustly transitive endomorphisms displaying critical points	ELIVAN NERI LIMA
17:30	A computer-assisted proof of the existence of blenders for a 3-dimensional Hénon-like family	NATALIA MC ALISTER CAFFAREL
17:40	Unique equilibrium states for Viana maps with small potentials	KECHENG LI
17:50	The Variational Principle for Countable State Shift Spaces With Specification	AMY SOMERS (UNIVERSITY OF CALIFORNIA SANTA BARBARA, USA), ALEXANDER PASCHAL (UNIVERSITY OF NORTH CAROLINA, USA)
18:00	Weakened Gibbs inequality for continuous potentials	ARANTHA RANU
18:10	A little hyperbolicity...": Ergodicity of partially hyperbolic endomorphisms	AUDREY TYLER
