# School on Synchrotron Light Sources and Their Applications | (smr 4205)

## Thursday 15 January 2026

**notitle - (13:00-17:05)**

***Chair: Alessandro Migliori (IAEA, Austria)***

| time  | title                                                                                                 | presenter          |
|-------|-------------------------------------------------------------------------------------------------------|--------------------|
| 13:00 | X-ray absorption techniques (EXAFS and XANES)                                                         | SOFIA DIAZ-MORENO  |
| 14:00 | Hands-on at the XAFS/XRF beamline at SESAME                                                           | MESSAOUD HARFOUCHE |
| 15:00 | Break                                                                                                 |                    |
| 15:05 | Open Science and FAIR data                                                                            | ANDREW GOETZ       |
| 16:05 | Visualizing ultrafast kinetic instabilities in femtosecond laser-heated solids using X-ray scattering | ÖZGÜL ÖZTÜRK       |
