

Domenico Marinucci is currently the chairman of the Department of Mathematics at the University of Rome Tor Vergata. His research interests are mainly devoted to random fields and their applications, including Cosmology, Climate Science and Neural Networks. He is a component of the ESA Planck and Euclid satellite missions; he has been an ERC Grantee (PASCAL - Probabilistic And Statistical techniques for Cosmological AppLications), Editor-in-Chief of the Electronic Journal of Statistics (IMS/Bernoulli Society) and Vice-Presidente of the International Astrostatistics Association. He is one of 23 scholars worldwide who have achieved the Annals Quadfecta of IMS (publishing on all top journals in stochastics); in 2021 he was Invited Speaker at the European Congress of Mathematics. He is a component of the executive board of the centre “Forms of Ancient Knowledge: Mathematics, Physics and Philosophy”; from 2024 he is an elected component of the scientific board of INdAM (Istituto Nazionale di Alta Matematica).
