# 4 Different Methods of Finding Opportunities/Generating Ideas

Next.....

Assessment and Feasibility Analysis

# Assessing the idea

Technology feasible?

Is there a market?

Is there a business opportunity?

# Feasibility Analysis

**Feasibility Analysis:** The process to determine if an idea is viable and worth pursuing for commercialization

## Product/service feasibility analysis

Customer interest, desirability and purchase interest

## Industry/market feasibility

Industry attractiveness

Market timeliness example

Identification of niche market

# Feasibility Analysis

## Organizational feasibility

Sufficient management expertise, organizational competence & resources to successfully launch a business

- Management ability
- Resource sufficiency

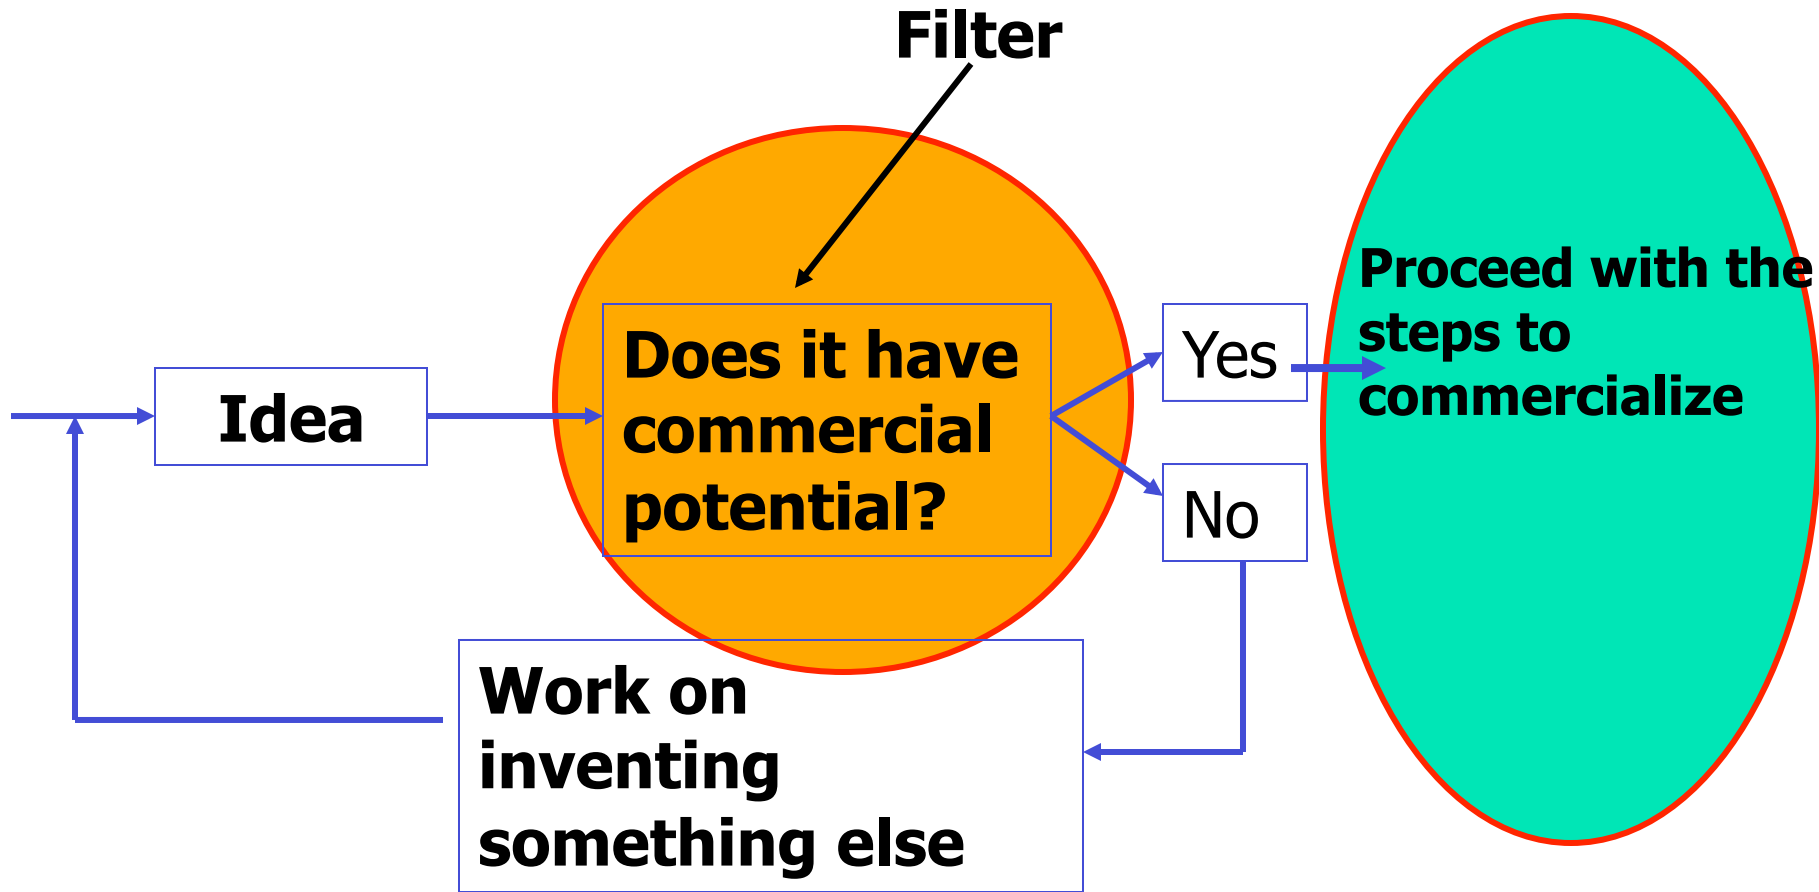

## Financial feasibility

Total start-up cash needed (example)

Financial performance of similar businesses

Overall Financial Attractiveness of the proposed venture

# Filtering Your Ideas

# Filtering of Technical Ideas

Just one idea at a time at the end helps focus

# Filters

**Filters:** Can be used to sort out feasible ideas right at the very beginning.

Examples of filters:

1. Market Opportunity and Market Attractiveness
2. Do you have the background to proceed with this product
3. Sustainability of market (seasonal or year-round), time scales of sustainability of market interest and technology. Give examples
4. Regional and international competition

What are the other factors that can be used as filters?

# Possible Filters

Cost  
Weight  
Size  
Safety/Health  
Speed  
Ease of Use  
Ease of Production
