Conference on Atomistic Simulations of Biomolecules: towards a Quantitative Understanding of Life Machinery | (smr 2828)

Thursday 09 March 2017

Session 11 - LB (Euler Lecture Hall) (09:00-14:00)

DRUGS AND OTHER INTERACTIONS

time	title	presenter
09:00	Introduction - Chair: Sergio PANTANO GUTIERREZ	
09:05	Designing drugs bacteria can not resist	PRAKASH, Meher
09:45	Applications of molecular modeling methods to host-guest supramolecular chemistry	SULIMAN, FakhEldin
10:25	Coffee break	
10:55	Conformational profile assessment of Human cathelicidin (II-37) and it's function as neutrophil apoptosis via the activation of FPRL1, explained using molecular dynamics simulations	SHARMA, Parul
11:25	Structural characterization of the TATA binding protein molecular surface from eukaryotic parasites, identification of druggable binding pockets	SANTIAGO TERRONES, Jose Angel
11:55	Lunch break
