Winter College on Optics: Advanced Optical Techniques for Bio-imaging | (smr 3104)

Monday 13 February 2017

First week - Budinich Lecture Hall (LB) (08:30-18:00)

| time | title | presenter |
|-------|--|-------------------|
| 08:30 | Registration | |
| 10:30 | Welcoming and introduction | |
| 10:45 | Introduction to optical microscopy: fundamental concepts and developments in modern microscopy | COLIN J. SHEPPARD |
| 12:30 | Lunch break | |
| 14:00 | Optical lithography: basics and practice | NICOLETA TOSA |
| 15:30 | Coffee break | |
| 16:00 | Experimental sessions: Abbe diffraction experiment | HUMBERTO CABRERA |
| 16:00 | Experimental sessions: UV-Vis optical fiber assisted spectroscopy in thin films and solutions | NICOLETA TOSA |
| 16:00 | Computer lab processing: Low cost microscope automation hardware and embedded software development | |
