# ICTP/ECMWF/Univ. L'Aquila Workshop on OpenIFS | (smr 3123)

## Thursday 08 June 2017

**- Adriatico Guest House - Giambiagi Lecture Hall (08:50-18:00)**

| time  | title                                                                             | presenter           |
|-------|-----------------------------------------------------------------------------------|---------------------|
| 08:50 | Sub-seasonal predictability of precipitation                                      | CHARLES JONES       |
| 09:30 | Sub-seasonal to seasonal applications in health                                   | ADRIAN TOMPKINS     |
| 10:10 | Inter-comparisons between LIS-Noah and LIS-HTESSEL surface flux partitioning      | CRAIG FERGUSON      |
| 10:30 | Coffee Break                                                                      |                     |
| 11:00 | Experiences from tuning and high-resolution climate modelling with EC-Earth 3     | JOST VON HARDENBERG |
| 11:40 | Modelling local ozone anomalies dynamics with OpenIFS                             | SIARHEI BARODKA     |
| 12:00 | Explaining contrasting climatic trends between the Central Himalaya and Karakoram | LEILA CARVALHO      |
| 12:20 | Discussion                                                                        |                     |
| 12:30 | Lunch                                                                             |                     |
| 14:00 | Computer Laboratory                                                               |                     |
| 15:30 | Coffee Break                                                                      |                     |
| 16:00 | Computer Laboratory - Brainstorm/Discussion                                       |                     |
