Conference: TMB-NET: Turbulent Mixing and Beyond - Non-Equilibrium Transport across the scales | (smr 3141)

Thursday 17 August 2017

- Leonardo Building - Budinich Lecture Hall (10:30-12:40)

time	title	presenter
10:30	Ohms law and the collision of magnetic flux ropes	GEKELMAN W
11:05	Laser generated Richtmyer-Meshkov and Rayleigh-Taylor instabilities and nonlinear wave-vortex paradigm in turbulent mixing	LUGOMER S
11:40	The dynamics of 2D turbulence in magnetically confined tokamak plasmas and statistical properties of the resulting transport	MCKEE G
12:10	Turbulent thermal mixing in multiple interacting magnetised electron temperature filaments	SYDORA RD
