Ninth ICTP Workshop on the Theory and Use of Regional Climate Models | (smr 3208)

Friday 01 June 2018

notitle - Budinich Lecture Hall (LB) (09:00-14:00)

| time | title | presenter |
|-------|--|-------------------------|
| 09:00 | Climate change projection over West Africa under 1.5C and 2C global warming scenarios | SYLLA, Bamba |
| 09:25 | Near-Term Increase in the Hazardous Weather Conditions over North America | ASHFAQ, Moetasim |
| 09:50 | North American CORDEX and other modeling efforts: Interesting & In-Progress Findings | BUKOVSKY, Melissa |
| 10:15 | North America and Australia CORDEX experiments using RegCM | SINES, Taleena |
| 10:40 | coffee break | |
| 11:00 | Tropical cyclones and their associated precipitation under climate change conditions from a set of RCA projections over the Central America/Mexico CORDEX domain | FUENTES FRANCO, Ramon |
| 11:25 | Inter-comparison of regional climate models and climatic trends in the Central America/Mexico CORDEX domain | CAVAZOS, Tereza |
| 11:50 | Preliminary assessment of RegCM4.7 over the Central America/Mexico CORDEX domain | TORRES ALAVEZ, Abraham |
| 12:15 | Added Value of RegCM4.6.1 over Central America and the Caribbean | VICHOT LLANO, Alejandro |
| 12:40 | lunch break | |
