# ICTP Summer School on Theory, Mechanisms and Hierarchical Modelling of Climate Dynamics: Multiple Equilibria in the Climate System | (smr 3214)

**Tuesday 26 June 2018**

**notitle - Giambiagi Lecture Hall (AGH) (08:30-17:30)**

| time  | title                                                                                   | presenter    |
|-------|-----------------------------------------------------------------------------------------|--------------|
| 08:30 | Fundamentals of Atmospheric Dynamics I                                                  | KANG, In-Sik |
| 09:30 | Fundamentals of Atmospheric Dynamics II                                                 | KANG, In-Sik |
| 10:30 | coffee break                                                                            |              |
| 11:00 | Fundamentals of Atmospheric Dynamics III                                                | KANG, In-Sik |
| 12:00 | lunch break                                                                             |              |
| 13:30 | Multiple equilibria in the climate system: understanding the role of oceans and sea ice | ROSE, Brian  |
| 14:30 | Multiple equilibria in the climate system: understanding the role of oceans and sea ice | ROSE, Brian  |
| 15:30 | coffee break                                                                            |              |
| 16:00 | Exercises with Isca                                                                     |              |
