

Combining IBA and AMS-14C to evidence archaeological artefact forgery

Tuesday, 21 May 2019 08:30 (1:00)

Content

Benefits and complementarity of accelerator-based methods in heritage forensics. Organisation of Heritage forensics stakeholders and structures in France. Cold case from museums: investigation of a purported Precolumbian mosaic skull acquired by a French museum. The detailed forensic investigation of the constituting materials illustrated with live movies eventually demonstrates that it is a forgery.
