International Space Weather Initiative Workshop | (smr 3292)

Tuesday 21 May 2019

Session 4: Regional Space Weather Studies - ex-SISSA Main Auditorium (14:40-17:30)

- Conveners: Dr. Nava, Bruno

time	title	presenter
14:40	Equatorial Upper Atmosphere and Space Weather - Results in India	TARUN PANT
15:00	Characteristics of storm time TEC variations observed over the equator-ward end of the mid-latitude regions	PATRICK SIBANDA
15:30	Coffee break	
16:00	The Effects of the Recurrent Storms on Fof2 at Ouagadougou Station during Solar Cycles 21-22	FREDERIC OUATTARA
16:20	Sensitivity of the ionosphere parameters, long-term variations, and its irregular structures in the Caucasus on geomagnetic activity	GODERDZI DIDEBILIDZE
16:40	On the nighttime enhancement of ionospheric electron density over the equatorial region	SNEHA YADAV
17:00	Questions and Discussion
