

# Pushing the Boundaries of Open Science at CERN

A virtual seminar co-organized by  
Science, Technology and Innovation Unit  
& the Marie Curie Library

14 April 2021 at 15:00

**Dr. Kamran Naim**

Head of Open Science at CERN

@kamrannaim

Information and Registration:  
<http://indico.ictp.it/event/9630/>

The research conducted at CERN has long embodied the values that have more recently come to be defined as the Open Science movement, which describes research and development that is collaborative, transparent, and reproducible and whose outputs are publicly available.

This presentation will provide an overview of CERN's activities to increase the accessibility, reuse and reproducibility of research in high energy physics, with a particular focus on the SCOAP3 program, and a range of additional services, particularly relating to Open Data.

The Abdus Salam  
**International Centre  
for Theoretical Physics**
