

*Since 2019, Dr. Hami Said Ahmed works as Technical Officer in agricultural water management at Soil and Water Management & Crop Nutrition Laboratory of the Joint FAO/IAEA Centre of Nuclear Techniques in Food and Agriculture based in Vienna, Austria. Mr. Hami Said Ahmed holds a PhD in Soil Science from Université D'Orléans, France, a M.Sc in Soil Science and Environmental Management and Agriculture from AgroPariTech & Université Pierre Marie Curie Paris 6 (UMPC), France and a M.sc in Biotechnology from Université de Lille 1, France. He is providing technical expertise and support through applied and adaptive research and development relating to agricultural water management using isotopic and nuclear techniques. He is currently conducting applied research on the use of Cosmic-Ray Neutron Sensor (CRNS) and Gamma-Ray Sensor (GRS) for area-wide soil moisture monitoring.*
