ICTP Conference on Adiabatic Quantum Computation / Quantum Annealing (hosting AQC2022) | (smr 3718)

Contribution ID: 229 Type: not specified

Nonnegative binary matrix factorization by continuous relaxation and reverse annealing

Tuesday, 21 June 2022 14:50 (0:20)

Content

Summary

Presenter(s): RENICHIRO HABA (Tohoku University, Japan)

Session Classification : not yet classified
