

Panel session on “Early career researchers”

Moderator

Angela Bracco, University of Milan, Italy

Abstract

This panel focuses on themes that are central to young researchers who are determined to be successful in their careers.

Four young researchers will discuss the main issues and barriers to overcome, such as the lack of funding, work overload, family obligations, difficulties in obtaining a job and in reconciling work and family life.

The four speakers are:

Ruhi Chitre

University of Warwick (UK), chair of The International Association of Physics Students

Mattia Ostinato

University of Barcelona (Spain) and member of Young Mind of the European Physical Society

Valentina Mariani

University of Perugia (Italy), recipient of the Oreal Prize

Aishwaryo Ghosh

S. N. Bose National Centre for Basic Sciences, Kolkata (India)

Through this panel, which includes young scientists from different parts of the world, we want to promote a better understanding of the problems they encounter and stimulate reflection on how we can facilitate their research careers.
