

Joint Summer School on Modeling Tools for Sustainable Development | (smr 3763)

An ICTP virtual meeting **Programme summary**

The Summer School is split into two parts, with a final High-Level Meeting to finish:

Week 1 (30th of May - 3rd of June):

- During this week, you will build upon the skills you gained from completing the OU courses through coaching sessions and various exercises. This will ensure that you fully understand and are able to utilize the modelling tool of your choice,

Week 2-3 (6th of June - 14th of June):

- During this period, you will conduct in-depth analyses using the tools and the knowledge you gained during the training, on country-specific cases. You will present your work via a PowerPoint presentation and poster **on the 15th of June** to the other participants and your trainers,
- Conduction of these analyses will be assisted with coaching sessions,

High-Level Meeting:

- **On the 16th of June**, you will attend a High-Level Meeting composed of speakers from various International Organizations, Universities and Research Institutes, where you may have the chance to present your findings from Week 2.

Note that participants will require a computer with stable internet access to participate in the training. It is recommended that participants have at least 8 GB of RAM and a relatively new computer. Nonetheless, specific tracks have additional computer requirements:

- Energy and Flexibility Modelling: **OSeMOSYS & FlexTool**: Windows 10 computer with Access Database **OR** Mac OS, 8GB RAM, MS Office.
- **Introduction to CLEWs**: Windows 10 computer, 8GB RAM.
