TENTH INTERNATIONAL WORKSHOP ON COMPUTATIONAL CONDENSED MATTER PHYSICS: TOTAL ENERGY AND FORCE METHODS | (smr 1300)

Contribution ID: 28 Type: not specified

Composition and temperature of the Earth's core constrained by combining ab initio calculations and seismic data

Saturday, 13 January 2001 14:30 (0:30)

Content

Summary

Primary author(s): D. ALFÈ

Presenter(s): D. ALFÈ

Session Classification: Composition and temperature of the Earth's core constrained by combining

ab initio calculations and seismic data
