Giuseppe Furlan (University of Trieste and ICTP)

FOREWORD

One of the challenges for any Organizing Committee is to publish the Proceedings in a time and in a form compatible with usefulness. Taking this point into consideration, both the contributors and participants in the Topical Meeting on Lepton Interactions and New Particles felt that some type of report should be available as soon as possible after the meeting. For this reason, although the following might not have the most polished of formats it should be solely considered for its value to those who took part. Indeed, this report contains only simple reproductions of the speakers' personal notes; and unfortunately, some contributions are missing. We hope that in spite of this, participants will benefit from the report.

We take this opportunity to gratefully acknowledge a financial contribution from the Istituto Nazionale di Fisica Nucleare, Italy.

The Organizing Committee
