TOPICAL CONFERENCE
ON
DYNAMICAL GROUPS AND INFINITE MULTIPLETS

INTERNATIONAL CENTRE FOR THEORETICAL PHYSICS

9-14 June 1969

P R E F A C E

A small informal meeting was held at the International Centre for Theoretical Physics from 9 to 14 June 1969 to discuss progress and problems connected with infinite multiplets in particle physics. We thought it would be of interest to a larger audience to publish rapidly a condensed version of the talks with all the references.
