Bibliography of Books in Print
in Medical Physics and Related Fields

Medical Physics Publishing Corporation
Madison, Wisconsin, U.S.A.

** These notes are intended for internal distribution only

MEDICAL PHYSICS PUBLISHING CORPORATION
B428 • 1300 University Ave. • Madison, Wisconsin • 53706
Phone: (608) 256-3300 • Telex: 650 285 1772

The Medical Physics Publishing Corporation (MPPC) was founded on October 15, 1985 by John Cameron, Professor of Medical Physics, Radiology and Physics at the University of Wisconsin-Madison. MPPC was organized under Wisconsin Statute 181 for nonprofit organizations with stated purposes that conform to the requirements of the Internal Revenue Service for classification as a 501(c)3 (i.e. tax exempt) organization.

We wish to thank Wisconsin Innovarium Ltd., the John R. Cameron Medical Physics Foundation, and the University of Wisconsin-Madison Department of Medical Physics for their generous support.

HOW TO ORDER

This is MPPC's fourth *Bibliography of Books in Print*. MPPC will accept orders for most books listed here. It should be noted, however, that entries marked with an asterisk (*) can be obtained for a lower price directly from the publisher. Prices are subject to change without notice. Order forms are included for your convenience. MPPC also accepts phone orders.

MPPC'S NEW PUBLICATIONS

MPPC has several of its own publications appearing this year. Many of the books published by MPPC are intended for the public, and concentrate on scientific and medical topics.

Our first book, published in January 1988, is titled *Well, It's Not My Fault! About the San Andreas Fault and Other Things* by J. Lenihan (see page 22). It is a series of short articles which describe various scientific subjects in a simple, interesting, and entertaining way.

Another book for the public, published by MPPC in February 1988, is titled *The Begetters & the Begotten: Whence and How Came We All?* by T. A. Leonard (see page 22). This is a lay person's guide to the history of the Earth and the evolution of life upon it.

MPPC plans to publish a series of small books that explain medical topics and science in understandable terms to the typical adult. This series is modeled after the *Que Sais Je* series published in France and the *Primeros Passos* series published in Brazil.

Books for medical physicists and related scientists scheduled for publication in 1988 include *A Non-Mathematical Approach to Basic MRI* by Dr. H-J. Smith, edited by F.N. Ranallo (see page 12). This is a text for residents in radiology, physicians, and physicists who want a basic understanding of MRI. Scheduled publication date is August 1988.

Another book in this category is *Proceedings of the Chest Imaging Conference 1987*, edited by W.W. Peppler & A.A. Alter (see page 10). This is the proceedings of the conference held at the University of Wisconsin-Madison in August 1987; it is being jointly published with the UW Department of Medical Physics. Tentative publication date is August 1988.

MPPC is also publishing *MRI Acceptance Testing & Quality Control*, edited by R.L. Dixon (see page 16). This is the proceedings of the AAPM Symposium held at Bowman-Gray School of Medicine, April 1988. Tentative publication date is August 1988.

Another book in progress is *Blackburn's Notes on the Application of Physics to Radiation Therapy*, edited by S. Shahabi (see page 2). It will be available in November 1988.

STAFF

Dr. John Cameron, President
Julie Bogle, Managing Editor
Kristin Daugherty, Office Manager
Alan Weber, Editor
Becky Chapman-Winter, Graphics Designer

TABLE OF CONTENTS

Radiation Therapy Physics: General Topics.....	1
Brachytherapy.....	2
Electron Beam Therapy.....	2
Hyperthermia.....	2
Treatment Planning.....	3
Dosimetry.....	3
Health Physics.....	4
Radiobiology.....	7
Physics of Diagnostic Radiology.....	8
Imaging.....	9
Digital Imaging.....	10
Computerized Tomography.....	11
Magnetic Resonance Imaging.....	11
Ultrasound.....	12
Nuclear Medicine.....	13
Radiologic Technology.....	16
Quality Control.....	16
Medical Physics, Biophysics, & Non-Radiological Physics.....	17
Biomedical Engineering.....	18
Light & Laser.....	19
Computers, Math & Statistics.....	21
Books in Science for Light Reading.....	22

suggested priority to purchase for a medical physics library
