

Electronic polarizability, vibartional frequencies, and other second derivatives of the energy from Density Functional Perturbation Theory (DFPT)

Tuesday, 28 January 2003 09:30 (1:30)

Content

Summary

Primary author(s) : STEFANO DE GIRONCOLI

Presenter(s) : STEFANO DE GIRONCOLI

Session Classification : Electronic polarizability, vibartional frequencies, and other second derivatives of the energy from Density Functional Perturbation Theory (DFPT)
