

Seventh Trieste Conference on Chemical Evolution and the Origin of Life:
Life in the Universe: From the Miller Experiment to the Search for Life on
other Worlds | (smr 1516)

Contribution ID : 48

Type : not specified

**Interstellar dust as a tracer of environments
favourable to planet formation: evidence for the
existence of a metallicity threshold**

Wednesday, 17 September 2003 16:00 (0:05)

Content

Summary

Primary author(s) : GIOVANNI VLADILO, ITALY

Presenter(s) : GIOVANNI VLADILO, ITALY

Session Classification : Interstellar dust as a tracer of environments favourable to planet formation:
evidence for the existence of a metallicity threshold
